

Enjoy new comfort levels with advanced modulating gas furnaces

The Echelon™ 9.M and 9.C Series 95% AFUE Efficiency

Heating & Air Conditioning

Coleman® Echelon™ modulating gas furnaces for

At last, home heating reaches a level you'll love

A cozy family gathering, a relaxing evening with friends, a quiet winter's morning—your comfort needs change from time to time. That's why Coleman® invented the Echelon™ modulating gas furnace. Its unique, continuously varying heating rate matches your desire for warmth precisely at the level you need at the moment. You may not notice how quietly it runs or how much it improves indoor air quality. But we think you'll notice its energy-efficient design, because you'll feel so good about saving fuel—and nature's resources. All in an attractive design that feels right at home.

Infinite comfort levels

Don't adjust your lifestyle to different temperature levels. Instead, enjoy a comfortable temperature that matches your level of living. That's the idea behind the Coleman® Echelon™ modulating gas furnace.

Traditional furnaces run at one or two heating rates. That wastes fuel. And it can make you uncomfortably cold or hot. But with the Echelon design, the firing rate continuously modulates at 1% increments to match your comfort level. Plus, you can choose constant speed blowers for outstanding comfort. Or choose select models with a blower using an electronically commutated motor (ECM) for gradual fan speed changes for comfort and efficiency. The result: you use less electricity. You hear less noise. And you feel a lot more comfortable.

Enjoy your ideal climate

Coleman® doesn't just deal with indoor comfort levels. With EcoTrak™ technology, coupled with a high-efficiency air conditioner, installers can set an operating cycle for the ECM motor that works best in your particular climate. You benefit from an operating cycle that delivers the right indoor comfort level regardless of where you live—dry, temperate or humid climate.

EcoTrak™

Quality is in the air

At Coleman®, we believe comfort goes more than skin deep. With every breath you take, you'll experience better air quality inside. That's because a Coleman® modulating gas furnace can run longer, more economically. And

longer run times mean longer periods of air filtration, so more dust, pollen, and mold spores are removed. Add in electronic air cleaners, and a wide range of indoor air quality products, and it all adds up to a healthy home atmosphere. Your Coleman® dealer can tell you more.

Hear the difference

Echelon modulating gas furnaces work over a continuous range of firing rates. What that means is fewer starts and stops that result in dramatically reduced noise levels. ECM technology makes the Echelon modulating design nearly 24 times less noisy than conventional furnaces.

One of the quietest sounds around your home

For those who want the very best.

Enjoy outstanding levels of comfort, quietness, and energy savings with our new Echelon™ modulating gas furnace

The right level all the time

The Echelon modulating gas furnace is the only design that heats at a continuous range of varying levels. In fact, it modulates in 1% increments to maintain more precise temperature control and stay within 1/2° of your thermostat's setpoint. And it's available with variable- or constant-speed blowers, so your home stays noticeably more comfortable throughout the day.

95% AFUE earns ENERGY STAR

With high fuel prices, it pays to have a system rated at 95% AFUE, which stands for Annual Fuel Utilization Efficiency. The number equals the portion of fuel used to heat your home, while only 5% escapes as exhaust. That's very efficient compared to standard models—and it's why the Coleman® design is ENERGY STAR qualified by the U.S. Government.

Get a tax credit

Thanks to outstanding AFUE efficiency, the Echelon modulating design may qualify you for federal energy tax credits. Plus, you'll see significant energy savings compared to conventional furnace designs.

Like what you're hearing?

Yes, the Echelon modulating gas furnace is running, even if you may not hear it. That's because it doesn't start and stop as loudly as other designs thanks to a continuously varying firing level. And when combined with a variable-speed air handler, your system grows even more silent. With Coleman®, it's all good!

Easy breathing

Continuously varying firing levels and more efficient run cycles have an added bonus—air in your house is filtered over longer periods of time. The result? Improved air quality throughout your home.

Model	Description	Heating Input Range	AFUE*
FC9M Series	Modulating Furnace—Constant Speed	60–120 Mbh Input	95%
FC9C Series	Modulating Furnace—Variable Speed	60–120 Mbh Input	95%

* AFUE = Annual Fuel Utilization Efficiency.

Warrantied for more peace-of-mind

Every Coleman® Echelon system is backed with one of the industry's best limited warranties. Every Echelon 95%+ AFUE gas furnace is backed with a lifetime limited warranty on the heat exchanger and a 5-year limited warranty on all other parts.

When you purchase any Coleman® Echelon modulating gas furnace with a matching Echelon 5T series air conditioner or heat pump, you'll receive our Premium System Warranty program: A 10-year limited parts warranty and a lifetime limited compressor and heat exchanger warranty.

Financing plans geared to work for you

Ask your Coleman® heating and air conditioning dealer about easy financing options. Applying takes just minutes, and, upon approval, you'll enjoy low monthly payments, special financing offers, and no annual fee.

Keep your family in comfort year-round...apply and buy a Coleman® heating and air conditioning unit with your easy-financing credit card today!

Coleman® has the right products for all seasons

Coleman® heating and air conditioning is all about being environmentally conscientious and reliable. It's part of a total comfort system of Echelon furnaces, heat pumps and air conditioners designed to deliver the best efficiency, the quietest operation and the easiest serviceability.

Echelon air conditioners offer up to 15+ SEER energy efficiency. And with WhisperDrive™ technology and scroll compressors, they're up to 4 times quieter and 60% more efficient than standard models. Echelon heat pumps are designed with "Hot Heat" pump technology that provides discharge temperatures that are warm to the touch. The sleek design of these units is a natural fit in any environment.

You can also count on Coleman® heating and air conditioning to provide all the necessary filters and advanced controls to complete your system.

Coleman® heating and air conditioning does more for your comfort by also offering a variety of Indoor Air Quality products and the Talking Thermostat.™ Now you can program your Coleman® home comfort system with help from audible instructions at the touch of a button. A contractor's contact information is also available, right at your fingertips.
